# Measuring and Evaluating Research Impact

## Facilitator

Dr Ged Hall, University of Leeds, England

---

Measuring the impact of research outside universities can sound like a whole new research project. Fitting this into your busy life can feel impossible. This session will cover some of the ways to solve this challenge and generate evidence to demonstrate impact.

By the end of the session, you should be able to:

- Describe some of the common mechanisms for evaluating research impact.
- Identify ways to implement the most appropriate mechanism in your research taking into account available resources.

## Who can join?

All early career researchers from WUN, ARUA, and AUN member universities are welcome to attend.

As part of our emerging collaborations with the African Research Universities Alliance (ARUA) and the ASEAN Universities Network (AUN), early career researchers from ARUA member universities are also very welcome to attend.

All participants must register using a valid WUN, ARUA, or AUN member university email address. Any registrations that do not use a WUN, ARUA, or AUN member university email address will not be confirmed.

## ABOUT WUN

The [Worldwide Universities Network \(WUN\)](#) brings together 24 leading comprehensive research universities in a collaborative partnership to advance research and education on major global challenges. WUN offers early career researchers (ECRs) from member universities webinar-based training sessions on transferrable skills related to their career development.
